This plug-in allows you to check the injection timing setting on a VE TDI engine (NOT PD or CR varieties). This needs to be done after you change the timing belt and should be done every once in a while to keep tabs on belt stretch and pump/pulley misalignment. The standard procedure for this is to have the engine idling at operating temperature (coolant temp >85°C), go to measuring block 000 ...

TDI engines take more time, and cost more money, than the regular gasoline engine. This financial penalty is, of course, passed directly to the consumer. Some experts have suggested that the diesel TDI engine can cost as much as 5 percent more to create and install than a gas engine of the same type, or several hundred dollars for each car. Diesel also produces a pollutant called nitrous oxide ...
